Letter from the CEO

The Global Leader in Innovation in Airsoft and Simulation Training

2020 was a challenging year for everyone but it didn't slow us down. We saw the strongest global market growth through one of the most difficult times this century. We're very optimistic about airsoft in 2021. Although, SHOT Show and IWA 2021 was cancelled, we will continue to release new and innovating products for the new year. We've been working and designing new products for the world to see and we're excited to share them with you. We are thankful for your support this year.

The Latest innovations in G&G GBB Pistols

In 2017, our engineers created an in-house GBB pistol design known as the GTP 9. It's the first GBB pistol with an adjustable barrel hop-up unit and spinning whirl valve. To improve user experience on the GBB pistol, we developed a new hop-up unit that can be adjusted from the muzzle instead of taking off the slide. This design not only makes the hop-up adjustment much easier compared to traditional designs, but also makes it more precise. Field tests show that the new adjustable barrel hop-up unit increased the range of shooting by 100% and reduced grouping size by 50%.

Later in 2019, we developed a new gas valve to improve the performance of the GBB pistols. Filling the gas into the GBB magazine takes a lot of time and creates gas leakage. The new enlarged gas valve is the solution to this on-going problem. Changing the design of the traditional gas valve, we installed the valve from the inside of the magazine and increased the size of the valve to achieve faster filling speed and durability with larger, stronger components. The new gas valve fills up the magazine 3 times faster without any gas leakage.

For 2021, we're on track to release 6 new GBB pistols to the market. The new addition will complement our existing line nicely. As the sport of airsoft is ever-changing, we are challenged with new trends and demand from players like yourself. 2021 will be a year for our products to stand out in the battlefield with its aesthetics.

The New Age of Powered AEG's

IIn 2015, we debuted the new trigger unit for Airsoft electric guns - known as the ETU. The new electronic trigger unit improved trigger speed and avoided trigger lock. The micro switch on the ETU only takes 2mm between each trigger pull, which allowed users faster response times in shooting or suppressing fire in semi-automatic. The quick control of the micro switch trigger unit is now one of the leading trends in the Airsoft Industry.

In 2016, we took the existing ETU to the next level and developed a new gearbox system, the G2. This advanced gearbox system featured an upgraded ETU and power-cut off switch for when a magazine is emptied or removed from the lower receiver. We also upgraded the MOSFET with 2 different burst controls, 3-round and 5-round burst, without the use of external remote controls. In addition, to the improved realism on the electronic components, we improved the mechanical design to reduce power consumption and refined the engagement of the bevel gear, thus diminishing the heat and stress on the motor. The G2 gearbox is an enhanced upgrade for the Ver. II gearbox and it keeps most of the internal parts compatible with the traditional gearbox. Users will be able to quickly familiarize themselves with the new G2 gearbox and be able to use after-market parts.

When developing new products or systems, we always concentrate on innovation and durability. Our focus is to bring the best user experience in Airsoft products and to cultivate this wonderful sport. Product quality and after-service is equally important. For Airsofters to enjoy each game, airsoft rifles must work flawlessly, and customer service should be worry-free.

Competitive Shooting and Military/Law Enforcement Training

In the span of 8 years, we have organized 3 International World Cup Shooting Competition Finals in Taiwan with great success. 70 finalists from 25 different countries participated in our most recent finals in 2019. Each competition brings us more participants from more countries.

The G&G World Cup Shooting Competition has become iconic in airsoft competitive shooting sports. In addition to competitive shooting, airsoft is great tool for military/law enforcement to train on because it is more cost-effective, safe, and convenient. When paired with the M.E.T. system, G&G offers the best alternative in training equipment. In fact, since 2017, we have worked closely with the Taiwanese military and built a complete training system at their training command center. As of today, the Taiwanese Marine Corp. and Special Forces also utilize G&G Airsoft products and the M.E.T. system for training. We will continue to work with the Taiwanese military and introduce airsoft as a training system to other command centers and schools in the upcoming year.

GC SERIES

INSPIRED BY THE MUSCLE LINES OF A CHEETAH, THE GC16 PREDATOR IS FULL OF AGGRESSIVE ELEMENTS IN ITS DESIGN. THE UNIQUE HANDGUARD COVERING THE MUZZLE OF THE GUN IMITATES THE FEROCITY OF A SNARLING CHEETAH. THIS DISTINCTIVE LOOK IS NOT ONLY FOR SHOW - IT ALSO PROVIDES THE LONGEST SIGHT RADIUS POSSIBLE WHEN USING IRONS. THE PREDATOR LINEUP COMES WITH 4 DIFFERENT COLORS AND 2 DIFFERENT GRADES, BUT ONLY THE GC16 GRADE FEATURES AMBIDEXTROUS FIRE SELECTORS. THE CM16 GRADE IS LIGHTER-WEIGHT AND BUDGET-FRIENDLY WITHOUT SACRIFICING THE ERGONOMIC DESIGN ON THE GRIP AND BUTT STOCK.

The PCC45 is installed with an electronic trigger unit (ETU) and G&G's 4th generation in-line MOSFET that features 3-round burst control, battery protection, active braking, and new current control unit to prevent overheating and burning.

Ambidextrous controls include the fire selector, bolt release, and charging handle.

The new 8" rail system design on the PCC45 includes a quick-detach lever for easy installation and removal. It features M-LOK sections at 3, 6, 9 o'clock positions, and a picatinny rail on top.
It also has an anti-rotation tab that interfaces with the receiver.

The quick-change spring guide can be accessed by collapsing the folding stock removing the backplate of the receiver.

Fully Licensed

COMBAT MACHINE AIRSOFT GUNS | AEG | POLYMER | 8 mm | MOSFET | ETU

Includes Bipod and Fake Bullets.

Our 3rd generation MOSFET inside the CM47 will prevent trigger burns with a controlled current. It will also offer a burst control feature with battery protection and active braking.

The new G&G CM47 is installed with the second generation electronic trigger unit (ETU) for instant trigger response and prevent trigger lock common in traditional trigger switch design.

AIRSOFTZONE / Austria

www.airsoftzone.com

G&G bbs feature an attractive price / performance ratio and a very high & stable quality level.
We started to sell G&G bbs more than 7 years ago because it was difficult to find good quality bbs on market. G&G bbs became very popular very fast and they are still our most demanded bbs in our product line. We get very positive feedbacks. Customers always confirm the high precision and quality standard.

Oregon Airsoft Arena / U.S.A.

www.oregon-airsoft.com

We only use G&G bbs inside our arena because they are manufactured to be extremely reliable and the most accurate on the market. There has never been a jam in any of our guns and they have been the top sellers in our pro shop for many years. They are irreplaceable as our go-to bb. We also support the outdoor player and when it comes to reliability G&G has the best Bio BB's. When players think that their gun is having problems most of the time it's because of lower grade Bio BB's. Once we show the customer the difference between brands, they switch to G&G Bio and the problems are gone.
We believe in being the best and selling the best and that is why when it comes to BB's we carry and sell the entire line of G&G BB's.

G&G M.I.T. Unit

G&G Military Intelligence Tracer Unit

G&G Military Intelligence Tracer Unit, short M.I.T Unit, was developed to fulfill the needs of military or law enforcement training programs in using Airsoft replicas as they are cleaner, cheaper and easier to maintain. However, the shooting range of the Airsoft replica is limited due to its nature. Most Airsoft replicas can only hit the target within 50 meters. By installing the M.I.T Unit to an Airsoft replica, the fire range can be increased up to 150 meters.
M.I.T accommodates multiple functions, like a tracer unit, a visible laser (laser function has to be used with G&G Battery Box w/ Laser Pointer), a BB counter and a chronometer to calculate the muzzle velocity. It is designed as a silencer so the M.I.T. Unit can be fitted to any airsoft replica that comes equipped with a threaded barrel.
The most interesting feature copies the concept of the MILES (Multiple Integrated Laser Engagement System), which is used by the US military for training. The MILES is basically a laser tag system, where the laser is activated by blanks being fired from the rifle. The M.I.T Unit functions very similarly. A sensor within the unit detects when a BB is fired and activates a short laser pulse, which would then activate sensors worn by other players when hit.

The target sensor could then signal the hit with sound and/or light. In other words, M.I.T Unit will not transform an airsoft gun into a laser gun because if a player runs out of BBs, the M.I.T Unit would not be activated. Therefore, players need to manage the consumption of their ammo. It's more realistic.
In sum, the basic idea of M.I.T Unit is to combine laser tag with airsoft, so that the advantages of both worlds can be utilized. At close distances the game would be the same as usual but beyond the maximal effective range of the BB pellets of roughly 50 m, encounters would still be possible up to around 150m.

The MIT is a multi-purpose tracer unit derived from G&G's Gen 1 tracer. It incorporates a simple control panel and what makes it different is the velocity measurement function, BB round counter, and support for integration with G&G battery boxes for coded laser pulses. When combined with helmet and vest receivers it becomes a complete training system. The MIT underwent mu ltiple re-designs and electronic tweaks to improve the product's construction and make it more lightweight. The all-aluminum casing helps to reduce weight. Distance was optimized through extensive day- and night-time testing and calibration of the receivers.

G&G M.I.T. Helmet, Sensor Vest

On top of the sensor helmet is a quick-release laser receiver. The receiver has sensors on four sides that allow the player to shoot from the top, front, left and right. The grid pattern on the front and back of the sensor vest can detected coded laser pulses to determine a hit. The signal is then transmitted to the helmet receiver to trigger flashing lights and noise. The hit player is then declared "dead", eliminating any disputes.

Other styles of the sensor vest are available for players to choose from.

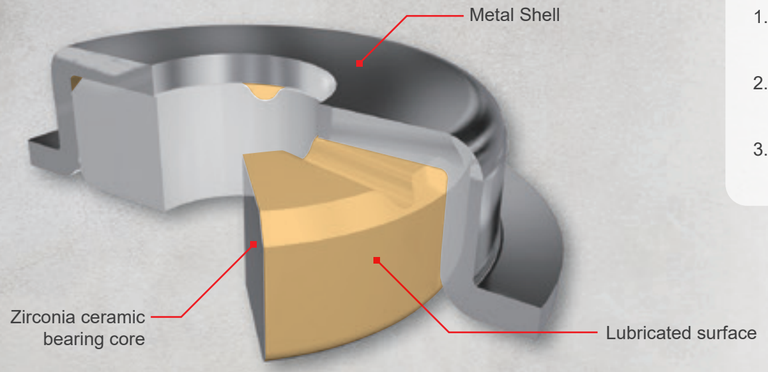
CERAMIC BUSHING



Ceramic material (Zirconia) Features:

1. High strength, wear and thermal shock resistance.
2. Pores of ceramic hold more lubrication than metal bearings.
3. Lower friction than other materials without any lubrication.

Advantage of Ceramic Bearings:

1. High strength against wear or tear in high cycle gearbox.
2. Heat resistance keeps ceramic bearings in shape under extreme working conditions.
3. Ceramic bearing is a type of Self-lubricating bearing, gear is able to spin freely even without any oil or grease.
