G&G ARMAMENT

Letter from the CEO

Leading innovation in Airsoft and Training

After 34 years in the Airsoft industry, G&G Armament has never stopped leading the trend and bringing the best design to customers. From the 2018 award of "The Best AEG: ARP 9" to the adjustable barrel hop-up unit in the GBB pistols, G&G continues to develop and offer the best quality and features to the Airsoft Market.

All G&G parts are manufactured in Taiwan and we partner with over 100 distributors in 68 different countries. We are the largest Airsoft manufacturer in Taiwan. 2018 was a very important year for G&G in that we reached maximum capacity and our highest sales peak in our history. Even as the global economy faced decline in 2019, G&G continued to carry the momentum of the growth of the previous year.

JAMES LIAO.

CHIEF EXECUTIVE OFFICER OF G&G ARMAMENT

COMPANY CULTURE

GUAY

Guay is an English translation from Chinese character that means unordinary, strange, or unusual. Guay Guay trading Co., Ltd., known as G&G Armament, took the character "Guay" to a different level and becomes the core value of the company.

Innovation

When G&G developing a new product, engineers first look at what can be different, what are the features that the current product doesn't offer, and what can be improved.

Ordinary design is not the best design. Ordinary in G&G means lazy to find improvement, which is not tolerated in G&G development team. Always search for better solution, and design improvement whether it is about functionality or assembly, are the main topics in the meeting.

Determination

Usually, manufacturers seek for cost-down solutions. Lower the production cost to reach maximum profit. G&G choose different path in manufacturing. From the smallest pin on the magazine to the plastic receiver, G&G team never stop to look for better materials even if the original or initial design is the cheapest way to produce. In G&G, we never stop looking for better, newer materials and technologies.

Vision

Airsoft is a positive, healthy sport that will help both military and public. Training with Airsoft in military is a safer, cheaper and convenient tool compares to live fire. G&G believes Airsoft is more than games or toys only for entertainment. We spent millions of dollars to promote Airsoft to the publics and military in Taiwan because Airsoft is a great tool and solution for many training programs today. G&G does not only manufacture, we are different because we develop and promote Airsoft, and because we love it.

INNOVATION AND ACCOMPLISHMENT

The New Era of GBB Pistol The Latest innovations in G&G GBB Pistols

Introduced in 2017, the G&G in-house designed GBB pistol known as the GTP 9 is the first GBB pistol with an adjustable barrel hop-up unit and spinning whirl valve. To improve user experience on the GBB pistol, G&G developed a new hop-up unit that can be adjusted from the muzzle instead of taking off the slide. This design not only makes the hop-up adjustment much easier compared to traditional designs, but also makes it more precise. Field tests show that the new adjustable barrel hop-up unit increased the range of shooting by 100% and reduced grouping size by 50%.

The new hop-up unit is designed to feature 120 different adjustments for situations when users shoot different weights of BBs. Poorly designed hop-ups with only 9 different adjustments causes issues of too little or too much hop when users change the weight of the BBs shot. This will never be an issue with the new G&G design. After solving the hop-up unit problem, we found solutions for the downward sloping performance when faced with low temperatures. The nature of gas causes frost to build up inside the GBB pistol cylinder after continuous shooting of more than 2 magazines. Performance will drop with frost. To solve this problem,

G&G developed the Whirl Valve to spin inside the cylinder, which creates a vortex to reduce frost during shooting.

Later in 2019, G&G developed a new gas valve to improve the performance of the GBB pistol. Filling the gas into the GBB magazine takes a lot of time and gas leakage. The new Enlarged Gas Valve is the solution to this problem. Changing the design of the traditional gas valve, G&G installed the valve from the inside of the magazine and increased the size of the valve to achieve faster filling speed and durability with larger, stronger components. The new gas valve fills up the magazine 3 times faster without any gas leakage.

The Age of ETU in AEG

In 2015, G&G debuted the new trigger unit for Airsoft electric guns - known as the ETU. The new electronic trigger unit improved trigger speed and avoided trigger lock. The micro switch on the ETU only takes 2mm between each trigger pull, which allowed users faster response times in shooting or suppressing fire in semi-automatic. The quick control of the micro switch trigger unit is now one of the leading trends in the Airsoft Industry.

In 2016, G&G took the ETU to the next level and developed a new gearbox system, the G2. This advanced gearbox system featured an upgraded ETU and power-cut off switch when a magazine is empty or removed from the lower receiver. The MOSFET upgraded with 2 different burst controls, 3-round and 5-round, without the use of external remote controls. In addition to the improved realism on the electronic components, G&G improved the mechanical design to reduce power consumption and refined the engagement of the bevel gear, thus diminishing the heat and stress on the motor. The G2 gearbox is an overall improvement for the Ver. II gearbox and it keeps most of the internal parts compatible with the traditional gearbox. Users will be able to quickly familiarize themselves with the new G2 gearbox and be able to use after-market parts.

When developing new products or systems, we always concentrate on innovation and durability. Our focus is to bring the best user experience in Airsoft products and to cultivate this wonderful sport. Product quality and after-service is equally important. For Airsofters to enjoy each game, Airsoft rifles must work flawlessly, and support should be worry-free.

Competitive Shooting and Military/Law Enforcement Training

G&G released the M.E.T. [Multifunctional Electronic Target) in 2012. In 8 years, we have organized 3 international World Cup Shooting Competition Finals in Taiwan with great success. 70 finalists from 25 different countries participated in our most recent Finals. Each competition brings us more participants from more countries. The G&G World Cup Shooting Competition has become iconic in Airsoft Competitive Shooting Sports.

Airsoft is a very good tool for military/law enforcement training because it is more cost-effective, safe, and convenient. Paired with the M.E.T. system, G&G offers the best alternative in training equipment. From 2017, we have worked closely with the Taiwanese military and built a complete training system at the training command center. As of today, the Taiwanese Marine Corp. and Special Forces also utilize G&G Airsoft products and the M.E.T. system for training. We will continue to work with the Taiwanese military and introduce Airsoft as a training system to other command centers and schools in the near future.

TIMELINE FOR G&G

Guay Guay Gun Shop was founded by Mr.Liao(James).

The first G&G Armament completely self-made replica arrived on the market, generating much excitement.

To better satisfy the needs of worldwide Airsofters, G&G established its second factory in Changhua, Taiwan.

Taiwan Airsoft & Airgun association was founded by Chief Executive Officer of G&G Armament James Liao and members from Airsoft guns manufactures. James Liao was elected to be the first President of TW A.A.A. In the same year, G&G organized the first G&G World Cup Extreme Shooting Competition in Taipei with the contestants coming from 12 different countries.

The first in-house design gas blowback pistol GPM92 was released. The second G&G World Cup Extreme Shooting Competition was organized in Taipei with 60 contestants from 25 countries.

G&G Armament is proud to announce that the production of our next generation pistol, the GPM92 GP2, started at 9:09 am on 9/9, 2019 from our head quarters located at No. 999, Zhonghua Rd., Shengan Township, Changhua County. We chose this particular date and time as the number 9 is a very special and lucky number in our culture. With this hope, G&G wishes that the new GPM92 GP2 GBB pistol will bring another peak in the global market for G&G.

Future

By targeting the overseas market and combining our experience in part manufacture and design, we were able to attract enormous attention from all over the world with our quality products.

G&G invented the unique pneumatic blowback system, a design that we have registered for patent in multiple countries.

G&G became the only Airsoft manufacturer passing the ISO 9001 - which further proves G&G as a company that has quality management and production system.

Cobalt Kinetics BAMF Team

Known to be one of the most innovated firearm manufacturers from Utah, USA, Cobalt Kinetics wins the heart of sport shooters. In early 2019, G&G debut the first Cobalt Kinetics BAMF Team Airsoft gun at Shot Show, it certainly drew a lot of attentions from the Airsofters. G&G faithfully replicated the Auto-Drop magazine function and included G&G latest G2 gearbox system including the power-cut safety and advance ETU trigger unit. The G&G BAMF is a bold solid Airsoft gun for those looking for futuristic, purpose driven and high performance AEG.

TR16 SBR 308

TR16 SBR 308

Ever since the new G2 gearbox has been released in 2017, feedbacks are nothing but good words. However, before 2019, G2 line only came with full size. TR16 SBR 308 line is the solution to those in need for CQB scenarios. There are two different styles, MkI and MkII, but both are short 12" barrel, alloy M-LOK rail with new butt stock feature more battery spaces than previous version. The MkI is more low-profile style whereas the MkII is more modern design. Same as their big brothers, TR16 SBR 308 also comes with G&G premium G2 gearbox in .308 style featuring improved air seal cylinder system, robust gearbox shells, responsive trigger pulls and burst control. If you are already satisfied with our TR16 MBR 308, then you won't be disappointed with our new SBR. If you haven't tried our G2 system, then our new SBR 308 line is your best timing to experience the top of the line product.

Tracer Unit UVT106

G-01-060 (Black)

UVT106 is G&G Armament latest compact size tracer unit. Diameter of 1.06 inches (about 2.7cm) and length of 2 inches (about 5.2cm), UVT106 is the smallest tracer unit made by G&G Armament so far.

Darkest Night, Brightest Light

Due to a large demand from the market, G&G Armament decided to start developing the compact size tracer unit from June, 2019. During the development, G&G realized the size is not a problem, but the battery capacity is. With a single Lithium Polymer battery inside this compact tracer unit, it won't last more than 16 minutes before the battery went dry. To put UV LED inside the 1x2 inches metal tube wasn't a real challenge; however, the tough part is how to squeeze in 2 batteries? After several tries on electric board design for the unit, the development team managed to integrate the clear tube on the electric board and now we have more spaces for the battery, but that was not enough. We need more spaces for 2 batteries. The development team decided to try if it is possible to reduce the size of the tube. The team tried 3 different sizes and finally we found the 8mm is the best one for the UVT106. Now we have two batteries inside the unit, what's next?

We took the unit to the field and see if there was anything we need to improve, then we found it was not easy to switch on/off the unit. The power button was on the bottom cover of the unit that means the user will have to remove the unit to switch on/off. Therefore, the development team decided to move the switch from the bottom cover to the front and now it is much easier for users to operate the unit.

G&G always seeks improvements and thinks from the user's point of view. This is our jobs, bring the best quality product and latest technology to the market.

Green Tracer BBs Only!

G & G ARMAMENT TRAINING DEVELOPMENT UNIT

G&G ARMAMENT TRAINING DEVELOPMENT UNIT

Change in human lifestyles and advances of weapon technologies, modern ground battles gradually progress from traditional field combats to urban warfare, which is more focus on faster reaction time, shorter range and rapid assault in close quarter battles; therefore, tension and pressure in modern battles are much higher.

Corresponding to new combat situations, building a traditional live round training center or facility will cost large amount of resources and facing several challenges such as environmental protection, loud

noises and ricochets. Also weapon control procedures, security risk and personnel management, these challenges will make training more difficult to keep up with modern warfare.

Taiwanese national defense also faced the same challenge in training, so they learned from the West Point Academy and the Swiss police department by using airsoft gun for training. This advance program can fully use the spaces in the facility and substantially lower the training cost. Airsoft training has proven to have a good result on improving muscle memories, personal combat mission, combat process, entry drill for room clearing and response to crisis.

Many military training centers in Taiwan have adopted G&G Armament Airsoft training guns and electronic target system. Cadets must be trained with an airsoft gun for a certain amount of hours before live round training.

This advance training program increases the training pattern and lowers the security risk. Training facilities can be rearranged or changed depends on the purpose of the training or mission, this program will improve Close Quarter combat skills and reaction under pressure.

Because of the durability, simulation capability and high product quality, the cost for military training has been lowered without sacrifice the result.

Approved by military and law enforcement from many other countries and field test by Taiwanese army, G&G airsoft training guns and electronic target system increase the training efficiency and lower the training cost. We welcome all training facilities and organizations to contract us for more information and let us help you build a more effective and inexpensive training system.

NATIONAL DEFENSE EDUCATION

▲ G&G CEO, James Liao promotes airsoft gun for years. During 2019 World Cup of CQB shooting competition, he brought all players to visit Presidential Office and had a picture with vice-president, Chen Jian-Ren.

▶ G&G CEO, James Liao took picture with President of R.O.C, Tsai Ing-Wen.

NATIONAL DEFENSE EDUCATION

Military / Law Enforcement Training System

Training with Airsoft products has been proven to be a safer, cheaper and better solution. This new training system developed by G&G Armament has been adopted by Taiwanese Infantry Training Command Centre. This G&G training system will solve the problem of building a training center near residential area.

▲ Military Training Instructor Grop Visiting G&G Armament

WE ARE LOOKING FOR

TRAINING SYSTEM DISTRIBUTORS

Because of the success of G&G Armament Airsoft training system in Taiwanese Army, we are now looking for new distributors in other countries. After 5 years of field test in competitive shooting events, G&G Multi-functional Electronic Target (M.E.T.) has been proven to be one of the most accurate and durable target systems in the market. Airsoft shooting has been applied on many military or law enforcement trainings because it is cheaper, safer and easier to build the facility. In 2019, Taiwanese Army Command adopted G&G Airsoft training system in southern Taiwan and launched the new training program. If you are interested in becoming a distributor, please email our sales team at sales@guay2.com, our representative will contact you within a few days.

PRK9

G&G ARP9 has been the top seller in the market, but G&G is not going to stop there. In 2019, G&G debut the first AK platform in 9mm, the PRK9.

This product line comes with three different lengths, the shortest one is PRK9, and then we got the folding stock one, PRK9 RTS and the longest one, PRK9L. The PRK9 family will suit your needs whether in indoor CQB or out in the fields.

There are two different magazine capacities you can choose from, 40 rounds or 200 rounds, and soon to be released, 1730 rounds drum magazine.

PRK9 is also equipped with G&G latest ETU and Mosfet for faster trigger response. The hop-up unit is the first-in-the market rotary hop-up chamber for Ver.III gearbox. With this much fire power and accuracy, PRK9 is the most deadly beast in the game.

From 2011, G&G Armament organized the first international Airsoft video contest and we have received 20 amazing videos from 16 contestants this year.

G&G judges were having headaches because every video are so good, it is very difficult to choose which one is the winner. Let us find out who wins the award from the link here, https://www.guay2.com/video_contest/2019/index.html, or scan the QR code below.

Thanks to the enthusiastic Japanese players for coming to participate in this event.

G&G CEO, James Liao had a picture with GG GIRLS

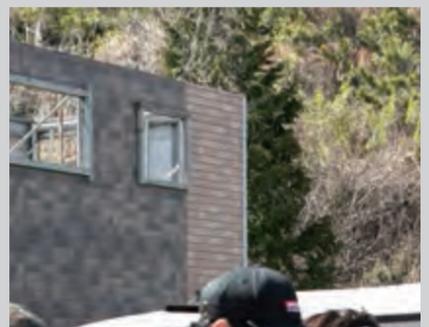

About G&G LOVERS

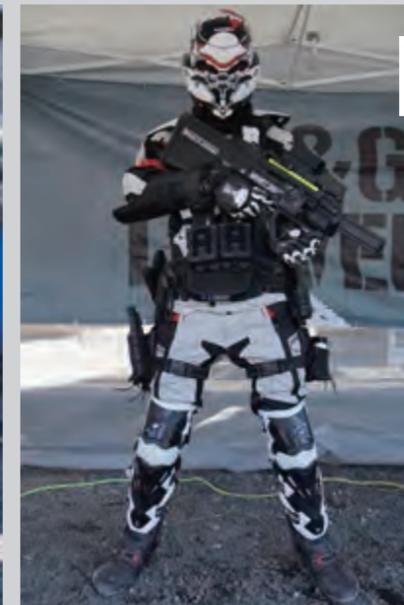

One of the most popular Airsoft events in Japan, the first "G&G Lovers" fan club gathering took place in Chiba Ken, Spring 2018. G&G is especially grateful for players from Hyogo, Wakayama, Osaka and the Iwate from the North traveled over 600 kilometers to join us in Chiba. We have got 410 Airsofters cheering and having fun with us. Everyone brought their G&G guns to the event and shared experiences with each other. Because of the success of first G&G Lovers event, we have prepared the second G&G Lovers right next year and the tickers were all sold out in 2 hours. We appreciate all G&G owners in Japan coming from all different prefectures to share their ideas and thoughts with us, and we are very thankful for our Japanese distributor, WH trade helping us organized events. We wouldn't make it without all your support! See you again in 2020 G&G Lovers!

Annual Article for G&G ARMAMENT

Media contribution for UK

---DEC.04.2019

Written by Bill from Airsoft Action Magazine

In the UK we have a passionate and committed airsoft community nationwide with games ranging from a simple “Sunday Skirmish” where anything goes up to fully immersive MilSim events with strict rules of engagement and uniform codes; add into this mix WWII Airsoft, Namsoft, Post-Apocalypse, and even Wild West themed games and you can begin to see the vibrancy that exists in our country!

Of course, like anywhere around the world, the player community are as passionate about their choices of AEGs and GBBs as anyone, even a little fickle when it comes to brands and models! The “AR” is still king when it comes to the choice of AEG, but more and more players are looking for something unique and different even when it comes to that single platform, and this is where G&G come fully into the equation!

Offering a wide choice of models even within the confines of the “AR Platform” the range of G&G models from the most basic of “mil-looking” CM/TR16 variants to the “Predator” already gives the player a lot of choice, but when you throw into the mix models

like the ARP9 and the “Firehawk” that choice becomes massive.

And of course the wider choice of models from around the globe and from different timelines means that G&G are catering not just to the “Skirmish and MilSim” players but also to those interested in historical games which are very popular; models like those from the “WWII” series (I love my GM1903 A3!) and perhaps more specifically for us in the UK, the “L85 Series” and the “Lee Enfield” that keeps appearing at shows (please release this soon!), mean that we can confidently take a G&G replica into a themed game knowing that it will not let us down, that we can rely on it to perform.

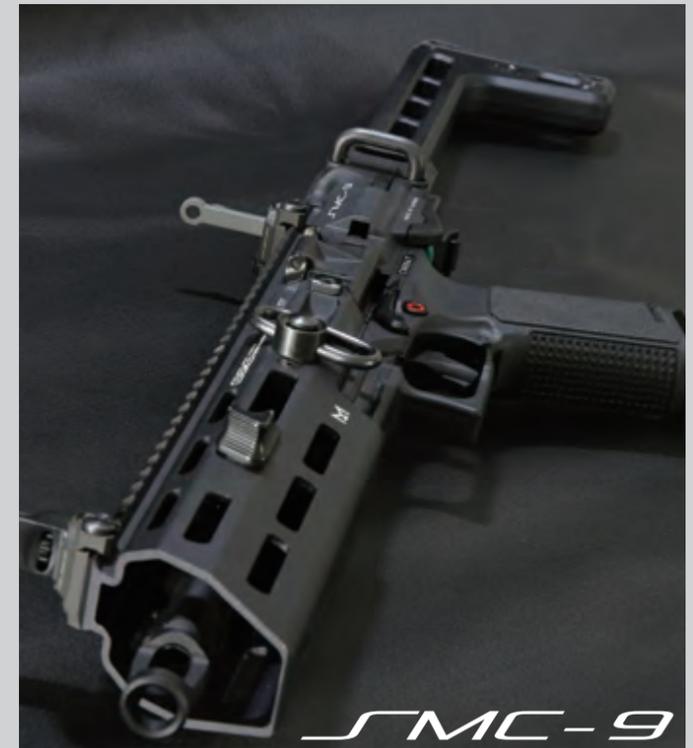

▲ L85 Series

And of course this is how the majority of players in the UK look at AEGs and GBBs from G&G, that they are innovative, solid, and reliable. For the new player they can be assured of an AEG that can be lifted from the box and, once BBs and a battery are added, played with immediately. For the more experienced player G&G offer advanced designs and models that will excite even the most jaded palette; the SMC9 carbine is eagerly awaited at the time of writing, as is the G2 System “BAMF Team” rifle with the new A.D.A.M !

And we know that whether we are skirmishers or themed-game players that G&G will have us covered too with a whole range of accessory and add-on parts; from optics, suppressors, tracer units, stocks, foregrips, and a whole host of internal parts G&G offers us everything that we need and more. Even for the more target-oriented “practical shooter” G&G offer the M.E.T system to keep us on our toes!

▲ BTMF Team

In the UK we can also be assured of superb service and after-purchase support for all G&G products thanks to a proficient and well-established supply chain that runs from G&G themselves in Taiwan via NUPROL to professional retailers around the country like Patrol Base, Combat UK, JD AIRSOFT, CRAWLEY SURPLUS STORE, and URBAN AIRSOFT. Thanks to this supply chain efficiency it means that even smaller retailers and even on-site shops can stock G&G and that makes the brand even more accessible to the most important part of this system, the players themselves!

Ultimately in the UK we know that G&G is a reputable and well-respected airsoft brand of long standing that treats their customers with honesty and integrity. We know that G&G are constantly innovating to bring us new models with greater reliability and performance, and that they will continue to do so in the future! As the UK airsoft community continues to grow and thrive, we know that G&G will be alongside us every step of the way.

Airsoft in Canada

Media contribution for Canada

---DEC.09.2019

Written by Matt Wasilewicz
from Canadian Airsoft Imports

Airsoft is a popular action sport in Canada, enjoyed by players of all ages. Up until about 10 years ago however, airsoft was very much an “underground” sport, played by small groups spread across the country, and for the most part completely unknown to the general public. That has all changed now, as over the past several years, many more airsoft shops have opened, and more importantly, playing fields.

For a long time, paintball was the only extreme shooting sport that most people were familiar with. There are easily over 150 paintball fields operating in Canada, ranging from small club style fields, to large commercial operations. It is these paintball facilities who have lots of contact with the general public, who have really helped introduce airsoft as a legitimate sport in Canada. Over the past several years, more and more paintball facilities have started offering airsoft as an option, to both the general public, and to existing airsoft communities as a legitimate venue for events. Now, airsoft games make up a large part of the activities at any paintball facility, and Canada has even started to see dedicated airsoft facilities open offering both outdoor and indoor facilities. Indoor

facilities are especially important to see in Canada, as winter is typically long and cold, so it gives players an option to enjoy their sport year round. One of the challenges faced by the community in general in Canada, is the fact that Canada is so large. Players cannot simply drive to events far away or board a train, as it can take days to travel across the country. The nature of our spread out industry has lead to unique airsoft demographics based on location, with different styles of play more prevalent in some areas than others.

Although most airsoft games in Canada tend to be small, usually up to 100 players or less for most skirmish games, there are some annual events that

have started to attract large numbers of players. For some of these large events, players will travel great distances to attend them, as there are not many oppourtinites to play in such a large group. One of the largest annual events in Canada is “Battlefield” , hosted in Quebec. Starting in 2012 and hosted by the FAQc, creators Sebastien Messier-Simon and Christophe Marleau have created one of the largest and most anticipated “Big Games” in Canada. 2019 marked one of the largest turnouts to the event, with 760 players present from all parts of Canada, and even players from different countries as well. The game is based off of a Tan vs Green format, where the goal is to hold control points on the field, earning points for your team which will decide the winner.

In conclusion, Airsoft continues to be a fast growing sport with more and more new players getting involved every day. Games in Canada continue to be exceptionally diverse, from the Redwood forests of BC, to the plains of the prairies, to the high paced indoor action of Toronto. From speedsoft to milsim, Canada continues to be a great location to play airsoft games of all kinds.

We have proudly carried G&G since our inception. We pride ourselves on the reliability and performance of our gun builds and starting with G&G is always a positive. Our experience with G&G internal parts as well as their guns can only be described as quality. The G&G bbs are a huge hit with us and our customers offering superior quality bbs and a great bottle design! We have used the 5x5 with great success even sending our very own home team to compete in Taiwan in 2019. We are proud to provide G&G to our market and always look forward to the new product releases.

「G&Gが日本で選ばれる理由」

Written by 株式会社ホワイトハウス

グレードに仕上げたモデルも存在させ、お客様に幅広い製品を提供していることが要因であると考えます。

また、外観だけでなく、ETU・MOSFETを搭載したモデルを多数ラインナップし、軽量で操作性が快適であると同時に剛性が非常に高い製品を適正な価格で販売しているのが、お客様に選ばれる最大の理由かと思えます。

これまで日本では、サバイバルゲームで使用する電動ガンは、リアルなものという風潮がありました。

しかし、近年世界中での Air Soft ブームが幅広い世代に受け入れられ、スポーツシューティングとして参加するユーザーが増えてきております。

そんな中で、G&GARMAMENT がユーザーから選ばれるのは、「The Airsoft Players' Choice Awards」の Best Airsoft Electric Gun 部門にて No.1 に選ばれた「ARP9」や、「GC16 PREDATOR」「ARP556」「GTP9」といったオリジナル電動ガンをライトユーザー向けに販売し大変好評を得ている事と、一方で、実銃をモデルアップしたライセンス製品でリアルさを追求し中身もハイ
