USER MANUAL

G-01-063

- Compact Size: Diameter 27mm (1.06"), Length 57.6mm(2.27")
- Lightweight: 38g
- High Battery Capacity: 360 mAh (Rechargeable LiPo)
- 3 Different Modes: Tracer + Muzzle Flash, Tracer Only, Muzzle Flash Only
- 14mm CCW Negative Threads
- Power-Saving Mode
- Auto Wake-Up Feature

- MODE 1 -
Tracer + Muzzle Flash
Blue + Red Lights

- MODE 2 -
Tracer Only
Blue Light

- MODE 3 -
Muzzle Flash Only
Red Light

- Switch between modes by rotating the front cap.
- Power OFF then ON within 5 seconds to advance to the next mode.
- Internal indicator light will display current lighting mode (see above); light will turn off after 15 seconds.
- The tracer unit will enter power-saving mode after 1 minute of inactivity and will turn off indicator light.
- To resume operation, shake the tracer unit or fire a BB through it. Indicator will remain turned off during auto wake-up feature.
- When battery level is low, a red light will flash and intermittently turn off the tracer unit (this will result in skips in lit BBs).
- When battery level drops beyond a certain threshold, the unit will automatically shut down.
