INSPIRED BY THE MUSCLE LINES OF A CHEETAH, THE GC16 PREDATOR IS FULL OF AGGRESSIVE ELEMENTS IN ITS DESIGN. THE UNIQUE HANDGUARD COVERING THE MUZZLE OF THE GUN IMITATES THE FEROCITY OF A SNARLING CHEETAH. THIS DISTINCTIVE LOOK IS NOT ONLY FOR SHOW - IT ALSO PROVIDES THE LONGEST SIGHT RADIUS POSSIBLE WHEN USING IRONS. THE PREDATOR LINEUP COMES WITH 4 DIFFERENT COLORS AND 2 DIFFERENT GRADES, BUT ONLY THE GC16 GRADE FEATURES AMBIDEXTROUS FIRE SELECTORS. THE CM16 GRADE IS LIGHTER-WEIGHT AND BUDGET-FRIENDLY WITHOUT SACRIFICING THE ERGONOMIC DESIGN ON THE GRIP AND BUTT STOCK.

Fake Bullets

Fully Licensed

Includes Bipod and Fake Bullets.

Our 3rd generation MOSFET inside the CM47 will prevent trigger burns with a controlled current. It will also offer a burst control feature with battery protection and active braking.

The new G&G CM47 is installed with the second generation electronic trigger unit (ETU) for instant trigger response and prevent trigger lock common in traditional trigger switch design.

**Oregon Airsoft Arena / U.S.A.**  
[www.oregon-airsoft.com](http://www.oregon-airsoft.com)

We only use G&G bbs inside our arena because they are manufactured to be extremely reliable and the most accurate on the market. There has never been a jam in any of our guns and they have been the top sellers in our pro shop for many years. They are irreplaceable as our go-to bb. We also support the outdoor player and when it comes to reliability G&G has the best Bio BB's. When players think that their gun is having problems most of the time it's because of lower grade Bio BB's. Once we show the customer the difference between brands, they switch to G&G Bio and the problems are gone. We believe in being the best and selling the best and that is why when it comes to BB's we carry and sell the entire line of G&G BB's.

**Power Gun / France**

## MULTIFUNCTIONAL ELECTRONIC TARGET

## M.E.T. UNIT

### MULTIFUNCTIONAL ELECTRONIC TARGET

M.E.T. unit is the perfect product for personal, military or law enforcement training. This is not an ordinary electronic target you could find anywhere in the market.

The G&G third generation MET has increased sensitivity, 4 LEDs, volume speakers and can be mounted on a wall. An independent power source is not required when linked up to multiple units; linked units will only require one power source. The third generation has 7 game settings (previously 4) waiting to be challenged.

### Instant multi-function electronic target for the fairest competition

- **Immediate:** Light and sound for immediate and definite display of results.
- **Fairness:** Electronic timer can be used all types of shooting competitions.
- **Environmentally friendly:** Electronic target is reusable and durable.
- **Innovative:** Multiple targets can be linked together to create new shooting modes.
- **Expandability:** Can be connected to external speakers.

## 7 CHALLENGE MODES

### 1) Competition Mode (default setting)

Press the start button once to select this mode. In this mode, all targets are in stand-by mode with Blue lights on. When the first target is hit, it will turn Red and all targets' light will be shut off. This mode will determine who hit the target first. Press the start button again to reinitiate competition mode.

### 2) Versus Mode

Press the start button twice to select this mode. In this mode, only the master target is in stand-by mode with blue lights on. After the master target has been hit, it will flash a blue light and count down for five seconds. Once the countdown is done, all targets will turn solid blue. The first target that was hit will turn red for five seconds and game play will be auto reset. The Master target will return to standby mode with the the blue light on and be ready for replay.

### 3) Random Mode

Press the start button three times to select this mode. In this mode, the Master target will display a blue light with the other linked targets in standby mode. As soon as the blue light is hit, the next target will be activated randomly. Once all the targets are shot, the last target will turn solid red for 5 seconds, signaling the end of the round. The unit will auto reset for the next round.

### 4) Practice Mode

Press the start button four times to select this mode. In this mode, all targets will display a blue light. The target will turn red when hit and the last target will blink red for five seconds, signaling the end of the round. The unit will auto reset for

the next round.

### 5) Search and Destroy Mode

Press the start button five times to select this mode. In this mode, the shooter will be challenged by locating the target from the sound it makes. The target will display a blue light and constantly make a noise. The noise will stop and the light will turn red once the target has been hit. To set up the game for this mode, targets should be hidden or covered without being seen easily. Shooters in this mode should rely on hearing instead of sight.

### 6) Hostage Rescue Mode

Press the start button six times to select this mode. This mode is the most difficult mode for most shooters. Red light: Hostile/ Blue light: Hostage. Red light will be turn off after hit. Blue light will stay light up after hit.

In a situation when last target was hit in red light, then the game will restart itself without pressing any button. However, if any target was hit in blue light during the game, then the game will not restart until the push button is pressed again.

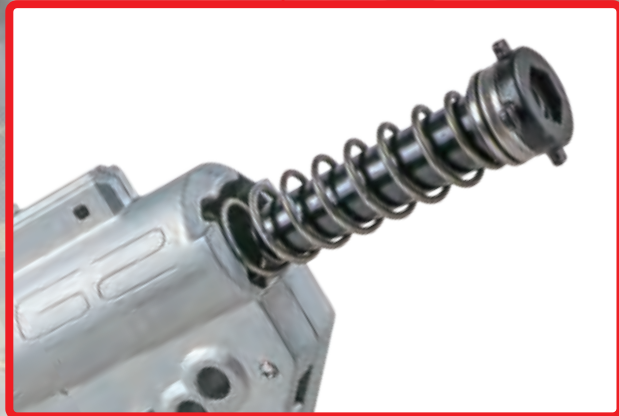

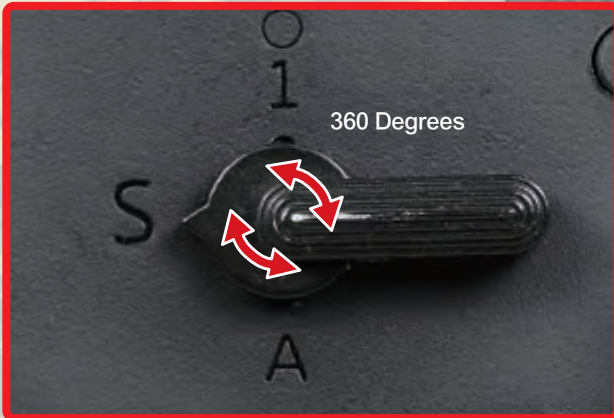

### 7) Time Bomb Mode

Press the start button seven times to select this mode. The initial target will light up in blue. The game starts after the blue initial target has been hit, then targets will begin randomly light up. Each target will only light up for 3 seconds, if the lighted target has not been hit within 3 second time, then this target will turn in red light and game over. Timer will stop as soon as the game is over.

# ETU SYSTEM

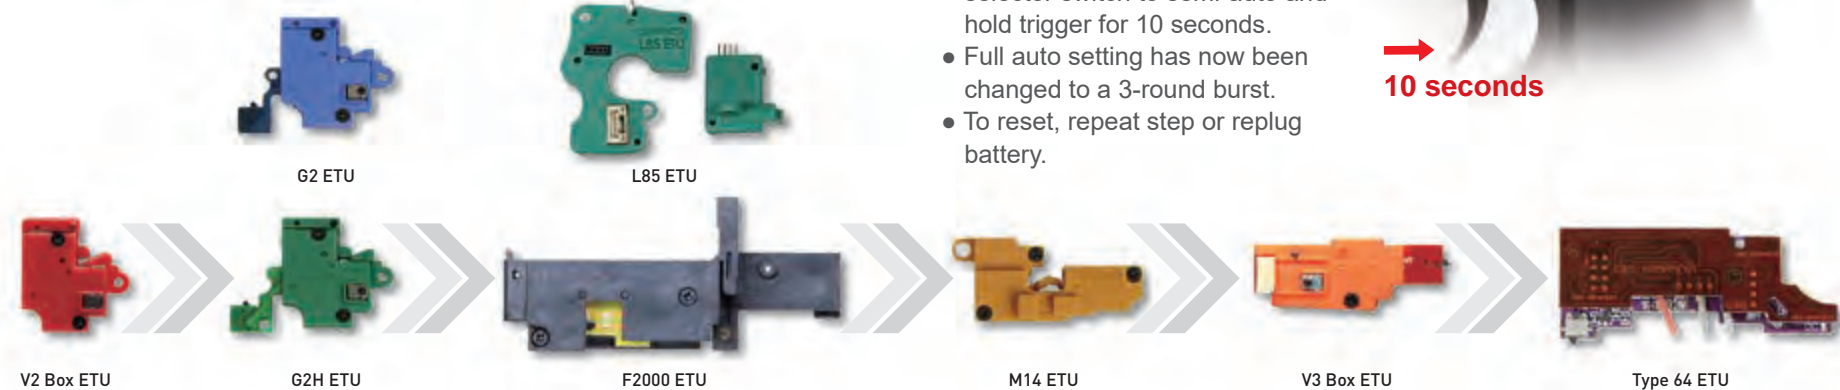

- G&G's Electronic Trigger Unit provides faster trigger response, eliminates trigger burnout, and prevents rapid fire gearbox lockup.
- Programmable fire mode changes full auto to a 3-round burst with no tools required.

## [ ETU AND TRIGGER PROGRAMMING ]

- To change full auto to 3-round burst, only trigger and selector switch are required.
- With battery plugged, switch the selector switch to semi-auto and hold trigger for 10 seconds.
- Full auto setting has now been changed to a 3-round burst.
- To reset, repeat step or replug battery.

# CERAMIC BUSHING

## Ceramic material (Zirconia) Features:

1. High strength, wear and thermal shock resistance.
2. Pores of ceramic hold more lubrication than metal bushings.
3. Lower coefficient of friction than other materials (without any lubrication).

## Advantage of Ceramic Bearings:

1. High strength against wear or tear in high cycle gearbox.
2. Heat resistance keeps ceramic bearings in shape under extreme working conditions.
3. Ceramic bearings are self-lubricating, allowing gears to spin freely even without any oil or grease.

We at G&G would like to show our appreciation to all the airsoft players and businesses who put their confidence in our brand. We are proud to announce the Customer Reward Program as token of our gratitude to G&G supporters worldwide.

# ENTRY DETAILS

Every new G&G Airsoft gun comes with an official G&G gun tag. Found on the back of the tag are two sets of numbers: a serial number and an authentication code hidden behind a scratch-off silver coating. Register both numbers online (guay2.com/3t or scan the QR code) for a chance to win a G&G gun on us! A winner is chosen every month, with one grand prize winner chosen at the end of the year!

If you have any questions regarding terms and conditions, please contact us via: [support@guay2.com](mailto:support@guay2.com)
